

Warnings Momentum simulation :

--- WARNING -----

Polyline edges and/or wires have been found on  
STRIP layer <mask 1> and will be ignored. Their  
location has been written to the DRC report.

-----  
Using the minimal snap distance of 0.0004 mm  
(4 layout resolution points) for layout healing.

--- WARNING -----

Layout healing changed the layout. The actual  
highest aggregate snap distance was 0.0002 mm.  
Further details have been written to the DRC  
report.

-----  
--- WARNING -----

The port setup needed to be corrected:  
Calibration will not be used for port "P1" (pins  
"P5" and "P6" are not on the edge between a  
conductive and a nonconductive region).
